

CPS Monitor

Interface for CPS

CERTIFICATION TARGA-CPS
ISDP10003

PRIVACY by default - PRIVACY by design

Software Solution

Interface for displaying transits, alarms and data from the management software of CPS license plate reading systems. Selea has developed two different types of interfaces: a web-base, for use on a PC and multi-monitor room using a normal browser (Firefox, Chrome) and another for tablets and smartphones based on an Android APP.

WEB-BASE version

By installing the CPS, which is a web server application, you can access its functions simply using your browser installed on your PC. This allows information to be displayed both on multiple monitors and by remote users (*bearing in mind that the CPS Monitor works exclusively in connection with the CPS software installed at the Control/Operating centre*). Through the WEB application, the system administrator can configure the CPS software and create users with different permissions, to whom the three primary use functions of the CPS MONITOR can be extended or limited, which are:

- **Basic:** through which the user receives the alarms and displays the transits
- **Explorer:** which in addition to receiving alarms and displaying transits, allows you to carry out investigations, extrapolate data and apply filters.
- **Config:** which allows, in addition to the aforementioned functions, to configure all the parameters and users of the CPS (*usually a function reserved for the system administrator*).

The CPS Monitor allows you to:

- Carry out checks on vehicles by consulting the database of your headquarter CPS.
- Receive reports on vehicles which are **uninsured** and with no **valid MOT**.
- Receive reports on **stolen vehicles, under investigation, reported in the black list** or as provided in the lists of the headquarter CPS.
- Conduct investigations and searches using filters
- Configure the CPS
- Display cameras and alerts on the map
- Activate and deactivate the various functions
- Visually identify the notifications received thanks to the different colour associated with each type of report.
- View the details of the report with all associated data.
- Connect to databases directly for an ANIA survey, insurance/revision/owners history to the **Ministry of Transport, Ministry of the Interior, lists integrated** in the headquarter CPS.

Like all applications developed by Selea, the CPS MONITOR WEB is also **certified ISDP10003:2018** - *privacy by design and privacy by default*.

Android

APP - version

App for **mobile** devices, developed to make police officers' control work fast and efficient when they are on the road. The APP works only on **Android devices** and exclusively in connection with the CPS software installed at the Police Station.

The CPS MONITOR APP allows you to:

- Carry out checks on vehicles by consulting the database of your headquarter CPS.
- Receive reports on vehicles which **are uninsured** and with **no valid MOT**.
- Receive reports on **stolen vehicles, under investigation**, reported in the **black list** or as provided in the lists of the headquarter CPS.
- Display cameras and alerts on the map
- Receive notifications both through an image and a **voice message** (*speech to text*) relating to the type of notification and the license plate number. An acoustic function very useful for public security operators working on the road, where the sun reflected on the screen often does not allow an easy and immediate display of the image of the vehicle reported.
- Visually identify the notifications received thanks to the different colour associated with each type of report.
- View the **connection status of the VPN**, the Tablet with the server, the connections between cameras and the headquarters server.
- Report a "false alarm" to the server.
- Connect to databases directly for an ANIA survey, insurance/revision/owners history to the **Ministry of Transport, Ministry of the Interior, lists integrated** in the headquarter CPS.

The CPS MONITOR APP is available for free on the Google PlayStore.

About Us

SELEA is specialized in the manufacture of number plate reading solutions, both for vehicle access control and for territorial security and traffic control. All of our products are developed and manufactured entirely in Italy. This means that our customers benefit from continuous and comprehensive technical support.

SELEA - EXPAND YOUR SENSES

SUPPORT

We provide both a pre-sales and after-sales technical support service to customers.

Training

VIDEOS

Free detailed videos about SELEA products and solutions.

CLASSROOM

Training and update courses at the Selea head office.

WEBINARS

Video conference training courses provided by techcal personnel.

WHERE TO BUY

Selea has a network of authorised Distributors throughout the country with whom it establishes design and market protection policies.
