PRIVACY by default - PRIVACY by design

INTERAGENCY

In the hands of Law Enforcement Agencies, it is **the most effective tool** available for receiving information **in real time** about critical events concerning public safety. Selea Bot uses Telegram to transform any mobile phone or portable PC into an audio and visual signalling device to connect **Local Police**, and **Investigative Units** (using a secure and encrypted communication channel) to provide an integrated urban video surveillance system.

How it works

For urban security in real time

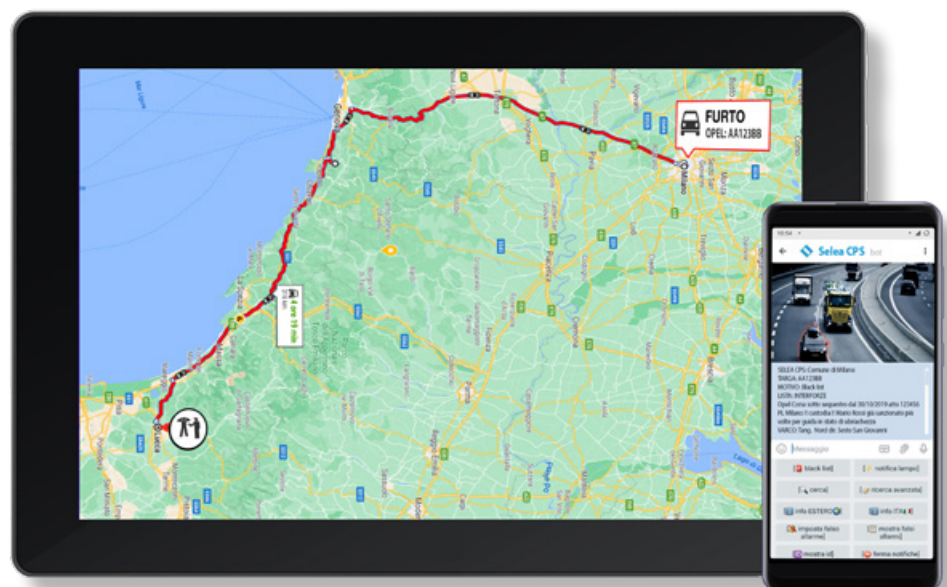

SELEA Bot is an App developed for Telegram and can therefore be used on any mobile (Android, iOS) or desktop (Windows, Linux) device. The App works exclusively in conjunction with the CPS software installed at the Headquarters. If there are multiple CPS systems throughout the country, the user must be enabled on each CPS system in order to receive relevant information. Each individual CPS can be configured so that the user receives only certain types of information regarding:

- specific OCR cameras (and not others), or all cameras;
- specific black lists;
- interagency list.

The person responsible for managing the CPS software therefore decides what a specific user receives.

The SELEA Bot allows you to:

- Carry out checks on vehicles by consulting the database of your CPS at the operations centre.
- Receive notifications regarding uninsured vehicles and vehicles without a roadworthiness certificate.
- Receive notifications about vehicles that have been stolen, under investigation or reported.
- To enter (or delete) number plates in the black list from mobile devices (for example smartphones).
- Communicate with the various Law Enforcement Agencies even when you are off duty or working in the field to organize urgent public safety activities.
- Share information between the various Law Enforcement Agencies to avoid overlap or interference with ongoing investigations.
- Share information with colleagues from other areas and regions so that a stolen vehicle, for example in Milan, can be intercepted by the Police Headquarters in Lucca.

WHERE TO BUY

Selea has a network of authorised Distributors throughout the country with whom it establishes design and market protection policies.

SUPPORT

We provide both a pre-sales and after-sales technical support service to customers.

All trademarks included in this document belong to their legitimate owners; third party brands, product names, trade names, corporate and company names mentioned may be trademarks of their respective owners or trademarks registered by other companies and have been used for explanatory purposes and for the benefit of the owner, without any intent to infringe Copyright.

About us

SELEA is specialized in the manufacture of number plate reading solutions, both for vehicle access control and for territorial security and traffic control. All of our products are developed and manufactured entirely in Italy. This means that our customers benefit from continuous and comprehensive technical support.

The experience accumulated in over 10 years of collaboration with various law enforcement agencies on video surveillance and license plate reading systems, give us today the opportunity to offer solutions capable of guaranteeing excellent results, and advanced tools for the **repression and prevention of crimes** (search for accomplices, stolen vehicles, vehicles without insurance/roadworthiness certificate, traffic analysis, and much more). These products can be part of an integrated urban security system, allowing the sharing of information between law enforcement and smart cities.
